**COMMUNITY RELATIONS PROGRAMS:** The June SWAT was held on 06/17/10. Sharon Browning, Program Manager for Consumer Health and Food Safety, introduced a new product made by FourStar.

According to FourStar it has developed a patent pending Dual Action Release Technology that regulates the release of microbials (*Bs-Bacillus sphaericus* and *Bti-Bacillus thuringiensis israelensis*) to the water surface and throughout the water column as the briquet slowly dissolves. The combination of *Bs* and *Bti* is proven to prevent resistance. FourStar Briquets can be applied to areas that contain aquatic life as well those who come into contact with those treated areas. Fourstar Briquets come in three sizes with control duration of 45, 90 and 180 days.

The Next SWAT meeting will be on July 15, 2010. Dr. Michael from the University of Arizona's Entomology Department will be presenting his current research on mosquito activity.

**BIRDS** -Testing for WNV in birds. One (1) dead bird specimen was called in to CHFS. The bird was a dove. Therefore, it was not submitted for testing doves are not recognized indicators for West Nile Virus.

**MOSQUITO**- There are no WNV positive mosquito sites in Pima County.

In support of the Arizona Department of Health Services (ADHS) Mosquito Borne Virus Surveillance Program, specimens collected are sent to ADHS Vector Borne and Zoonotic Disease Section (VBZD) for arbovirus testing and identification. The Mosquito Borne Virus Surveillance Program tests adult female mosquitoes for mosquito related diseases (Western Equine Encephalitis, St. Louis Encephalitis and West Nile Virus).
